

ENORME[®]
MAGNETIC ACTUATORS

NEXT-GENERATION RELIABILITY
FOR KNITTING & HOSIERY MACHINES

Innovative, fast, and highly reliable – ENORME actuators bring advanced magnetic technology to knitting and hosiery machines, overcoming the limitations of traditional piezoceramic solutions.

KEY ADVANTAGES

- Plug-and-play compatibility – Immediate setup with no machine downtime
- Magnetic technology – Consistent performance over time
- Resistance to oils & heat – Reliable in harsh industrial environments
- Compact design – Ideal for retrofitting existing machines
- High reliability – Reduced maintenance and downtime

PROVEN IN THE FIELD

- Commercial usage since 2017 with leading machine manufacturers.
- Adopted by Santoni, Terrot, Lonati, Mayer C, Dakong, Wellknit, Pailung and others.
- Hundreds of successful retrofits replacing WAC, JM, and Matrix actuators.
- Verified failure rate around 1.5% with installations running reliably for over five years.

MAINTENANCE MADE EASY

90% of interventions require only loosening six screws to replace the internal board – no recalibration needed. FLAP replacement is equally straightforward. A complete maintenance manual is available.

AT A GLANCE

Advantage	Benefit
Plug-and-play compatibility	No machine downtime, immediate setup
Magnetic technology	Consistent performance over time
Resistance to oils & heat	Suitable for harsh industrial environments
Compact design	Perfect for retrofits
High reliability	Reduced maintenance & downtime

ENORME already provides an extensive range of actuator models fully compatible with other brands.

If your model is not currently available in our catalog, our team can develop a customized version to meet your requirements.
